

## Edward McCamey

August 19, 1946 - November 16, 2017

Ed McCamey, of Wills Point, passed away on the evening of November 16, 2017. Ed was born August 19, 1946 in Bethesda, MD to Clifford and Phyllis (Aldrich) McCamey, both of whom preceded him in death.

Ed grew up in the Dallas area and was a 1964 graduate of Bryan Adams High School and graduated from UT-Dallas with a degree in anthropology. He served honorably in the US Army having been stationed in Europe and achieving the rank of Captain. He was a member of the Toastmasters International for over 46 years as well as Southwest LiveSteam. Ed was a longtime and very active member of Good Shepherd Episcopal Church in Terrell where his devotion to his Lord was evident in his service to the church serving on the Vestry as Senior Warden. He had a love of life and was known for his many and varied interests and hobbies with a special fondness for model trains. Ed also traveled abroad doing research for the National Science Foundation in places like Nepal and South America where he demonstrated and increased his knowledge of anthropology as he studied primitive cultures and their ways of life. Believing that each day was a gift from the Lord and a chance to learn more, Ed leaves a legacy of unconditional love for his family that they will treasure always until they are reunited again.

Ed is survived by his wife, Helen McCamey of Wills Point; children: Heather McCamey of New Orleans, Michael McCamey of Dallas; step-children: Tiffany Bates-Stroud of Quinlan, Derek Bates of Durango, CO, Terri Antwine of Farmington, AR, Amanda Dunklin of Brownsboro, Elvie Carpenter of

“ Ed was one of the first Proto:87 contacts I made, way back in 1994. He sat behind me at Jim Harper's clinic on detailing track; when the discussion turned from 1:48 scale to 1:87, he distinguished himself with his knowledge and his outrageous moustache. By the end of the clinic, I had a handful of names of folks who were interested in pushing the frontier to Proto:87, but not Ed's. I sought that moustache out, and we met in the bar where I convinced him to join me.

*That was his first mistake. Over the ensuing two decades, Ed proved to be a leading light of the Proto:87 movement. It was he who designed, financed and distributed the gauge that I use to this day. When the NMRA technical standards committee needed a chair, Ed took that on, and with boundless energy and enthusiasm refined Proto:scale from recommended practices to full NMRA standards. If you became a member of the Yahoo group, chances are that Ed approved it as neither Andy nor I could get ahead of him.*

*Over the years, whenever I was to attend a convention where I thought I meet see Ed, I would make sure we met. Many times, he was a willing and companionable roomie. I can't think of many people whose company I have enjoyed more.*

*I never met any members of Ed's family. However, from the way he talked about them, it was clear that he loved them dearly. I am so sorry for their loss.*
